DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

- Species I directed to an image recording device comprising: a first recording head; a second recording head; a curing section; and a controller, wherein the second image forming process is a process for a background, and a layer of the second ink has a transmission density not less than 0.15 or an L value not less than 65 (as applied to claim 1 in its current form)
- Species II directed to an image recording device comprising: a first recording head; a second recording head; a curing section; and a controller, wherein the first image forming process is a process for background, and a layer of the second ink has a transmission density not less than 0.16 or an L value not less than 65 (as applied to claim 24 in its current form)

The species are independent or distinct because they represent mutually exclusive species. The first image forming process and the second image forming process could not both be processes for background at the same time.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 2853

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
